## **Rolling Prairie Library System Partners with Ameren for Energy Savings**

(DECATUR, ILLINOIS) – Rolling Prairie Library System is a proud partner with Ameren Illinois Utilities in their WATT Solutions program.

The Ameren Illinois Utilities have donated WATT Solution kits with Kill A Watt EZ power meters to Rolling Prairie Library System and other the downstate library systems. These meters have been distributed to RPLS public library members. This partnership will allow library patrons to borrow WATT Solutions kits through their local libraries at no cost.

WATT Solutions is part of the Ameren Illinois Utilities Act On Energy initiative ([ActOnEnergy.com](http://ActOnEnergy.com)), which is helping Ameren Illinois Utilities residential and business customers save money by using energy more efficiently.

“Using the Kill A Watt EZ power use measuring device, our WATT Solutions initiative shows you how much it costs to operate electrical appliances and devices. You also can learn how much it costs to leave appliances and devices on, such as computers, printers and modems,” said Stan Ogden, Ameren Illinois Utilities vice president of Customer Service and Public Relations.

“Rolling Prairie Library System is delighted to partner with Ameren in the WATT Solutions initiative to make this an easy to use tool readily available to the general public,” said Beverly Obert, Rolling Prairie Library System Executive Director.

If you are interested in checking out a Kill A Watt EZ power meter, visit a Rolling Prairie Library System member library in one of these cities: Athens, Atwood, Blue Mound, Cerro Gordo, Clinton, Decatur, Effingham, Forsyth, Illiopolis, Lincoln, Mason City, Mt. Pulaski, Mt. Zion, New Berlin, Pana, Petersburg, Rochester, Shelbyville, Sherman, Sullivan, Toledo, Taylorville, Weldon, and Williamsville.
